

The Credence of Credo Star

At Credo World School, our name and logo connect ancient wisdom with modern education, self-belief with extraordinary achievement. **Credo, meaning "I believe,"** embodies the truth that self-belief is the foundation of success.

The pentagram logo is emblematic of five essential dimensions:

- **Academic Excellence** – discovering learning joy, developing critical thinking, and sparking lifelong curiosity.
- **Physical Prowess** – develop strong bodies and resilient personalities through sporting activities, wellness, and teamwork.
- **Creative Expression** – exploring art, music, drama, and innovation
- **Character and Values** – fostering kindness, integrity, and ethical leadership for global citizenship.
- **Social-Emotional Intelligence** – building confidence, empathy, and strong relationships.

These areas intertwine - academic success builds confidence enhancing creativity, physical wellness supports emotional balance, strong values deepen friendships, and emotional intelligence elevates all achievements. The 'O' represents our inclusive community where every child is valued.

This philosophy lives throughout our school: **in classrooms where teachers ignite curiosity**, on playgrounds teaching grace and teamwork, **in art studios honoring expression**, during assemblies celebrating kindness equally with achievements, and in counseling sessions developing emotional strengths.

We chose the star because it connects students to universal aspirations while reminding them that being stellar means becoming their best selves. Every child's star shines differently – through mathematics, athletics, artistry, or compassion. Our role is helping each discover their unique constellation. The four houses of the school are also named after constellations: Aquila, Draco, Orion and Pegasus. The Credo philosophy grows with students – **from kindergarteners believing "I can read" to graduates declaring "I can change the world."**

We help children discover not just what they can achieve, but who they can become. **When a child truly believes in self, they don't just learn – they transform. They don't just participate – they excel. They don't just grow – they become contributory individuals which the world needs.**
